

Foreword

The purpose of this book is to help Maxwell owners in the proper care and operation of their cars. In it we have tried to make as clear as possible, by words and diagrams, the operation and construction of Maxwell motor cars. We have tried to tell the owner how to drive his car and how to take such care of it as will keep it always in good condition.

This instruction book is a book of instructions and general information, not a repair man's manual.

If anything should happen to necessitate tearing down any part of your Maxwell car, we advise you to take it to a competent repair man—it is cheaper in the end.

If, at any time, you desire suggestions or instructions as to anything about your car, not covered in this book, our Parts and Service Departments at the Tarrytown, N. Y., and New Castle, Ind., plants will gladly furnish information, advice and assistance.

Please feel free to write regarding any point about which you may desire help.

If a new owner, it will pay you to carefully read this entire book before you put your car into operation. Particular attention is called to the general information contained in the introduction.

MAXWELL-BRISCOE MOTOR COMPANY.
